

Power Tracker Latin America

Dynamic, Current & Comprehensive Power Intelligence

Power Industry Database

Industrial Info Resources (IIR) now introduces Power Industry coverage for Latin America. Access a definitive database of power generating assets, events, owners and key decision makers in South America, Mexico & Central America. IIR's coverage includes base load, intermediate and peak power generation plants capable of producing 25 megawatts and greater in all fuel categories.

- Installed Base Plant & Unit Details
- Turbine & Boiler Equipment Details
- Planned & Unplanned Unit Outages
- New Build Units
- Major Capital & Maintenance Projects
- Key Management Contacts

IIR's PECWeb Power Tracker is designed to streamline sales and marketing efforts for equipment and service providers pursuing business in the global power generation marketplace. Access a world of information in our new and expanding online Power Industry database, with the most up-to-date intelligence available from any source.

Date	Plant Name	MW Out	Outage Type	Market Region	Time
November 18, 2009	Mount Storm Power Station	522	Rescheduled	Mid Atlantic	4:14 PM
November 18, 2009	Mount Storm Power Station	570.2	Rescheduled	Mid Atlantic	4:14 PM
November 18, 2009	Ocala-Ecor Power	223	New	Southwest	3:33 PM
November 18, 2009	San Miguel Power Station	410	Forced	Southwest	1:57 PM
November 18, 2009	Hawaii Power Station	803.2	Forced	Rocky Mountains	1:43 PM
November 18, 2009	Comanche Generation Station	424.8	Forced	Rocky Mountains	1:19 PM
November 18, 2009	Rio Nogales Power	284	Rescheduled	Southwest	1:03 PM
November 18, 2009	Rio Nogales 01 CTRHRSG (172 MW), Rio Nogales 02 CTRHRSG (172 MW), Rio Nogales 03 CTRHRSG (172 MW) & Rio Nogales 01 ST 034 MW are all rescheduled at this time.				
November 18, 2009	AE3 Inwood Power	235	Forced	Northeast	12:31 PM

EVENT TRACKING

Major Capital Project Coverage

Details include major capital and maintenance projects valued at \$5 million and greater for private and government-owned power plants, including power generation projects at other Industrial processing or manufacturing plants (cogeneration). Access includes over 450 active projects valued at \$178 billion. Coverage includes grassroot construction, unit additions, environmental compliance projects, modernizations, life extensions, repowerings, refurbishments, overhauls, uprates and major scheduled maintenance outages.

Title	Contact	QC Date	Telephone	On Site	Email
Plant Manager	Jorge Luiz Lima de Rezende	Feb-2008	(24) 33620000	Yes	ronald@electronuclear.gov.br
Maintenance Manager	Ronaldo Cardoso	May-2008	(24) 33620000	Yes	ronald@electronuclear.gov.br
Purchasing Manager	Carlos Guilherme	Feb-2008	(24) 33620000	Yes	carlos@electronuclear.gov.br
Engineering Manager	Ronaldo Cardoso	Feb-2008	(24) 33620000	Yes	ronald@electronuclear.gov.br
Environmental Manager	Carlos Athanati	Feb-2008	(24) 33620000	Yes	athanati@electronuclear.gov.br
Safety Manager	Carlos Athanati	Feb-2008	(24) 33620000	Yes	athanati@electronuclear.gov.br
IT Manager	Roy Koib	Feb-2008	(24) 33620000	Yes	ruykoib@electronuclear.gov.br
HR Manager	Caro Wandery	Feb-2008	(21) 264-8790	Yes	

Unit Maintenance Outage Tracking

IIR performs daily reporting on planned and unplanned unit outages for the Power Industry. Access a database to over 2,900 historical, ongoing and future unit outages at power stations across Europe. Details includes station and unit information, capacity, fuel source, outage start and stop dates, key decision makers, address detail and brief scope of work.

New Generation Tracking

New generation tracking can be found in IIR's New Build Database. Identified at the unit level, this database tracks new capacity additions planned at existing power stations and in grassroot construction.

Coverage includes over 1,400 units in Latin America representing 116 gigawatts of new capacity under development. Each report includes ownership, design capacity, fuel type, unit type and technology, plus construction and start-up dates.

STATUS	PLANTS	UNITS	TOTAL MW
UNDER DEVELOPMENT	461	1,433	116,457
CANCELLED or ON-HOLD	83	203	21,248
TOTAL	544	1,636	137,705

ASSET TRACKING

Plant & Unit Coverage for Installed Generation

Access a comprehensive database of over 1,100 operating plants in Latin America for data analysis, forecasting sales and prospecting new opportunities. Details are provided on over 4,200 generating units owned by private energy producers, utilities and industrial energy producers. Unique database attributes include unit type, fuel usage, design and operating capacities, ownership, key management contacts, and fuel switch changes.

STATUS	PLANTS	UNITS	TOTAL MW
COMMISSIONED	1,113	4,060	272,555
DECOMMISSIONED	53	189	3,431
TOTAL	1,166	4,249	275,986

Turbine & Engine Generator Profiles

Details on turbine and engine generators that support power station units for Latin America are available in a comprehensive equipment database. Included are over 750 aero-derivative and heavy frame combustion turbines, 946 steam turbines, and 2,241 internal combustion, hydro turbines and wind farms. Each turbine profile includes manufacturer name, model, gas turbine inlet cooling, environmental controls and E&C information.

STATUS	PLANTS	UNITS	TOTAL MW
COMMISSIONED	947	3,771	263,376
DECOMMISSIONED	48	178	3,177
TOTAL	995	3,949	266,553

Boiler Profiles

Identify boiler installations at power generation stations throughout the region in a comprehensive database that includes government-owned, private and industrial energy producers. Over 940 boiler profiles are available for field-erected units. Details include the manufacturer, type, model, environmental controls utilized and E&C information.

STATUS	PLANTS	UNITS	TOTAL MW
COMMISSIONED	336	899	69,817
DECOMMISSIONED	12	44	1,070
TOTAL	348	943	70,887

PECWeb *Plus!* - Advanced Tool for Sales Tracking and Analytics

Enhance your Power Tracker subscription to include PECWeb Plus!, a new solution for sales activity tracking and collaboration. With PECWeb Plus!, perform multiple sales follow-up functions directly from any report view then through an interactive dashboard, manage sales activity and create multiple reports on the fly. Learn how we can improve user adoption and sales tracking for your organization today.

Limited Time Offer

We are constantly adding new information to the Latin America Power Industry Database. As we expand into other markets, subscribe today and help direct our research development efforts with your valuable input.
